MECHANICAL ADVISORS YOU CAN TRUST

MECHANICAL SERVICE STEEL ENERGY WATER ELECTRICAL MISSION CRITICAL

RK Mechanical is a true **partner** in project development

RK Mechanical is the region's leading full-service mechanical contractor and an advisor to general contractors. We collaboratively strive for continuous improvement throughout every phase of a project. When you have a mechanical question, call us for the answer. We're a single, reliable source for every mechanical contracting need. No one else in the region can compete with our combined capabilities, facilities, equipment, expertise and service. You can work with fewer subcontractors while gaining peace of mind knowing that we will get the job done—more quickly, safely and efficiently.

RK's **six business units** can fulfill **several project requirements**.

RK Mechanical is a business unit of RK. We often partner with RK's other business units, and our combined skill set makes us the region's most powerful single source for mechanical subcontracting, steel fabrication, water treatment, custom fabrication, prefabricated construction products, electrical service and facilities maintenance services. If RK Mechanical can't do it, one of our partner units can.

You benefit from having **one partner** that can do so much:

- As design/build collaborators, we help you plan the project.
- You can trust the top mechanical contractor for plumbing, piping and sheet metal.
- Gain the experience of a contractor that's worked on high-profile global projects.
- Use us for your structural and miscellaneous steel and streamline projects.
- Rely on our 24/7 facilities maintenance services.
- Discover innovative, sustainable solutions for water treatment.

No matter **what type of facility**, **we can do it**.

- Office / Commercial High Rise
- Government / Municipal
- Healthcare / Laboratory
- Residential / Multi-tenant / Hotel
- Retail / Restaurant
- Airport / Aviation
- Data Center / Technology

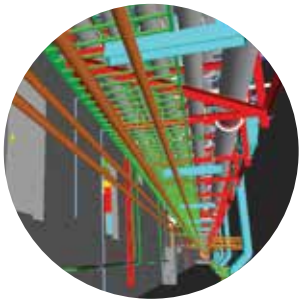
SERVICES OVERVIEW

PLANNING : Preconstruction and Project Development

RK's preconstruction team collaborates with clients and internal teams to ensure that all factors are evaluated, and all requirements are met, in designing project solutions. We can meet the most complex project challenges and have deep experience in design/assist and design/build roles. Our team includes several licensed engineers, expert estimators and over a dozen LEED-Certified professionals. We go beyond merely meeting requirements—we help you find better, more efficient solutions that exceed them.

DESIGN ENGINEERING : Building Information Modeling and CAD



RK is a trailblazer in using building information modeling (BIM) to design project solutions that can be constructed with minimal change orders and maximum efficiency. We have nearly 40 CAD experts that collectively offer over 312 years of CAD and 410 years of field experience. That's 722 years of CAD and field expertise at your service! Our BIM experts can look beyond the computer screen and into the field to more effectively run clash detection and anticipate issues before they emerge on-site, minimizing project mistakes and maximizing efficiency.

PROJECT MANAGEMENT: Operations and On-Site Supervision

The RK operations team promises reliable project management and job site field support throughout the life of the project. Operations develops detailed project schedules and provides field supervision to ensure maximum safety and productivity at the job site. Project managers stay attuned to changing client needs and work with all project teams as needed to keep projects on schedule and budget. We conduct Customer Expectation Surveys (CES) to track performance and provide a tangible gauge of client satisfaction and project results.

MECHANICAL EXECUTION: Plumbing, Piping and Sheet Metal

With over 155,000 square feet of fabrication space between our Denver and Henderson, Colorado locations, we have the facilities, tools and skills to fabricate all types of sheet metal, piping and plumbing components for any construction project. And we do more than mechanical contracting. We also provide structural and miscellaneous steel as well as prefabricated facilities that are easily assembled and less expensive than on-site construction. Whatever your project needs, we can make in, install it and service it.

POST-CONSTRUCTION SERVICES: Facilities Maintenance Solutions

RK Service is a reliable single source for all building maintenance needs, including HVAC, plumbing, drain cleaning, refrigeration, electrical, excavation, water treatment and facilities staffing services. For owners and property managers, we ensure that buildings run more efficiently, that occupants are comfortable and that tenants are happy. We have over 50 service technicians on-call 24-7, so there's just one number to call for all facilities maintenance needs.

Two Locations, 23 acres, and **155,000 square feet** of fabrication facilities.

DENVER

RK Mechanical operates out of our sixteen-acre, 100,000 square foot Denver, Colorado Headquarters facility which includes our corporate office and boasts impressive 65,000 square feet of fabrication space:

- 40,000 sq. ft. for sheet metal
- 25,000 sq. ft. for plumbing

HENDERSON

Our well-equipped seven-acre, 110,000 square-foot facility in Henderson, Colorado is clean, climate-controlled and operated by a skilled team. This location includes 90,000 square feet of fabrication space:

- 50,000 sq. ft. for structural and modular fabrication
- 30,000 sq. ft. for piping fabrication
- 10,000 sq. ft. for nonferrous metals fabrication

In-house transportation: We operate our own fleet of trucks to expedite on-site delivery, get there fast during emergencies and avoid the higher costs of third-party carriers.

Quality and **Safety**? Our **accreditations** and **record** say it all.

RK is recognized for quality and safety: We're an ISO 9001:2008 Certified contractor. We're also the 53rd U.S. business in all industries to achieve the OSHA VPP Star Mobile Workforce Accreditation. Plus, we've also earned the OSHA VPP Worksite Accreditation; *RK is the only U.S. firm in the construction industry to achieve both of these prestigious OSHA standings.* Safety and quality aren't just preached; they're woven through everything we do, every single day.

Safety and Quality Accreditations and Certifications

- ISO 9001:2008 Registration
- ASME Certified Fabricator (L, R, S & U Stamps)
- OSHA VPP Star Mobile Workforce Accreditation
- OSHA VPP Star Worksite Accreditation
- AISC Certification
- OSHA Chase Blue Level Partnership (six different years)
- ABC Platinum STEP Award (every year since 2004; 2001, 1999)
- ABC Gold STEP Award (five different years)
- ABC Silver STEP Award
- ABC Outstanding Safety Program (seven different years)
- ABC Outstanding Safety Record Winner (six different years)
- ABC Most Improved Safety Program
- Pinnacol Assurance Circle of Safety (two different years)
- ACCA Award Member: Safety Master's Club
- CDLE Cost Containment Honoree
