

SERVICE®

PLUMBING AND DRAIN SERVICES

RK Service provides full-spectrum plumbing and drain services, as well as preventative maintenance for commercial properties. Our certified technicians specialize in service, repair and replacement of drain and plumbing system components. Common problems we solve include: backed-up drains, sewer problems, clogged toilets, burst pipes, water leaks and water heater repairs.

Drain and Plumbing System Assessments and Leak Detection

We assess your drainage and plumbing systems to catch issues early and help reduce future repairs.

High-Pressure (5000 psi) Water Jetting

Our pressurized equipment blows water through pipes to clean out grease, residue and debris for more efficient pipes.

Pipe Line Locates

We're able to pinpoint the size, depth and location of commercial grade pipes, which allows us to uncover issues without expensive excavation work.

Camera Inspection

We visually inspect underground pipes to discover what and where the problem is and also provide our customers with the camera footage.

Backflow Certification

We ensure that your backflow device is properly installed, protecting your water supply from contaminants.

Excavation Services

When necessary, our team will perform excavation services for line repair and replacement.

Remodeling

We install new supply pipes, fixtures and more for remodeling projects.

Service, Repair and Replacement

- Domestic, hydronic and steam boilers
- Pumps
- Grease traps
- Faucets, toilets and pipes
- Water and sewer lines

Facility operators across the Rocky Mountain Region rely on RK Service to ensure their buildings run smoothly, tenants are satisfied and occupants are comfortable. We have a large staff of trained service technicians available 24/7 to keep your facilities up and running at all times.

RK Service is backed by RK, one of the region's largest suppliers of construction, manufacturing and service solutions. With nearly 1,900 employees, including over 1,000 skilled trade workers, we have the experience and capabilities to meet your facility needs.
